8. Apply below design to crypto payments USDT,

[← Go back to payment methods](#)

USDT (Tether) Payment

Select protocol:

 **Ethereum (ERC20)**

 **Tron (TRC20)**

 **Binance Smart Chain (BEP20)**

 **Solana Network**

 **Polygon Network**

-- Choose Network --

 Check Payment Status

apply only as per existing design as all crypto does not have these networks, only a few crypto have, hence follow what we have in our existing pattern and then design.

9. Use reference from <https://techone-ch>

Approved

 **Finalize your order from**

 **Protected transaction with**

 **Secure checkout with**

 **Complete your premium purchase from**

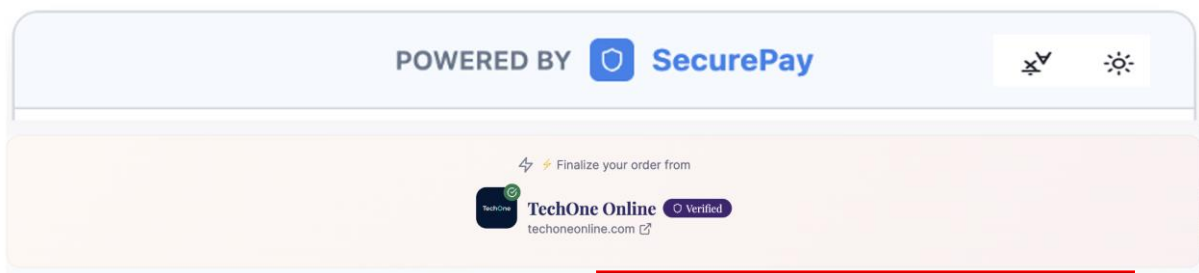

10. Use this icon for image on top
11. Move configure button from the header and plan somewhere on write with setting icon, as on the top it's creating issue while testing and responsive its.

12. Reference from <https://pay-brand-spark.lovable.app/> need to add a layer on the top having powered by

So if I can explain, you need to change below image

the final one should look like below
