

Please update the bolt (Payment Gateway UP) and lovable(flow-wizardry-checkout) git as instructed.

<https://flow-wizardry-checkout.lovable.app/> we have added coupon code option, remove any text from it

also remove coupon code option when the coupon code already applied. add include tax and fee under the total amount

Align the processing icon which is down from the other icon, also if it could be an animated icon

Select payment method will have a small search icon which will be extended after click

Customer details section add with address,

also in mobile collapse screen no need to show edit only expand to show after expand the edit button will show

When you click on credit card payment, it should show this form, which has more user experience-related fields

After clicking on the Pay Now button, it should take to pre-3ds page, remove the sandbox mode from here and end the page on timer; after that setup next screen which will ask for their OTP not this screen and then the same page which we have already.

Apply below design to crypto payments USDT, apply only as per existing design as all crypto does not have these networks, only a few crypto have, hence follow what we have in our existing pattern and then design.

Use reference from <https://techone-checkout-flow.lovable.app/>

Use this icon for image on top

Move configure button from the header and place somewhere on write with setting icon, as on the top it's creating issue while testing and responsive its.

Reference from <https://pay-brand-spark.lovable.app/> need to add a layer on the top having powered by

So if I can explain, you need to change below image the final one should look like below
